When it welcomed its first patient in 1955, no one dreamed that in just 50 short years, UCLA Medical Center would join the ranks of the most established, elite hospitals. In fact, UCLA Medical Center has repeatedly been included on the Honor Roll since *U.S. News & World Report* began their America’s Best Hospitals Survey many years ago. For 50 years, we’ve accomplished plenty.

From primary care physicians in your neighborhood to the most delicate surgery and latest technological innovations, UCLA Healthcare has it all.

One of the top-ranked hospitals in the U.S. is right in your backyard.
